

THE CLEAR CHOICE™
For Hydraulic Dredging

Company Overview

History

Dredge America was founded in 1990 by Dan and Renee McDougal. The company started under the name McDougal Construction with the primary focus being on civil projects. In 1993, Dredge America acquired a small dredge contracting company and opened a new division devoted to portable hydraulic dredging. After two years, management saw the potential of the dredging division and turned the company's attention exclusively to hydraulic dredging. Dredge America is now a second-generation family business and has become the leading company for portable hydraulic dredging services in the United States.

Culture

Dredge America is a national marine contractor performing dredging services throughout the US and North America. We specialize in portable hydraulic dredging services to restore our nation's lakes, rivers, and waterways. With more than three decades of experience, Dredge America is committed to continually improving its' expertise and delivering quality dredging and consulting services.

We believe our purpose is to improve quality of life through innovative hydraulic dredging solutions.

Values

During the last 35 years, many dredging companies have come and gone. However, Dredge America has become the respected

name in professional dredging services, because portable hydraulic dredging is our only business, and all our resources are centered on being the very best at our core competency.

In order to build a foundation centered on success, Dredge America's leadership team established our core values; Committed, Do the Right Thing, and Can-Do Attitude. All employees at Dredge America share these qualities and convictions which only strengthens our team, improves the offering to our clients, and creates a culture of continuous improvement.

Dredge America is "Committed to do the right thing with a can-do attitude®."

People

At Dredge America, we strongly believe in mobilizing highly qualified people on-site where challenges occur, and problems need to be resolved immediately. Our project leaders are empowered to act as contract representatives for Dredge America and can make critical decisions, lessening potential delays and increasing our adaptability. Our professional field personnel are clean cut, articulate, trained, and experienced. Supporting our field crews is an expert office staff, a full-time repair shop, a traveling field service team, and a vast network of contacts within the industry.

Company Overview

Safety

Dredge America is insured, bonded and adheres to a strict safety program. Our expert crews are extremely sensitive to the conditions of any project site and take every measure to ensure a clean, well-managed job. Meaning our clients benefit from the most experienced, skilled, well-trained and efficient crews in the country.

Dredge America maintains a strong safety record as a result of our proactive safety program and dedication to ensuring our personnel and equipment are at the cutting edge of the industry. Our detailed safety program is focused on our team members first and ensuring they come home safely each day. We have a full-time safety manager on staff that manages our safety program powered by the HCSS online safety platform. Our crews perform daily safety meetings, weekly stand downs, job hazard analysis, and our management team meets quarterly to review and improve upon our safety program.

Qualifications

Contractor Capacity

Dredge America employs the best talent in the industry and operates a state of the art fleet allowing our team to take on projects of all sizes and complexity levels. Dredge America has completed work in over 30 states and Puerto Rico to date and in size ranges from \$100,000 to more than \$20,000,000.

Management Qualifications

Dredge America's leadership team and project execution staff are comprised of top professionals in the field of portable hydraulic dredging. Our combined experience of over 50 years in the dredging market makes us the ideal choice for working on your unique project.

Project Experience

With 35+ years of experience and over 400 projects completed, Dredge America is committed to continually improving its' expertise and delivering quality dredging and consulting services. During this time, we've engaged in numerous projects with varying scopes and budget levels.

Dredge America will more than just "manage" your project. Our expertise allows us to save you time, money, and limit your risk exposure.

Equipment

Dredge America presently owns and operates 18 portable hydraulic dredges ranging in size from a 6" to an 18".

Dredge America maintains a variety of dredge designs because we believe that one tool does not perform all jobs. Each of the 18 styles and sizes of dredges that we operate have unique characteristics that must be matched to the individual job in which they are being assigned. We believe it is critical to the success of any dredging project to have the right tool for the right job.

Dredge America also owns over 100,000 linear feet of HDPE pipe, a vast array of support barges, work boats, survey vessels, anchor scows, long reach excavators, marsh excavators, air boats, and other support equipment necessary to support our clients dredging and dredge rental needs.

Our Services

Contracting

Dredge America is a professional, reliable and innovative leader in delivering portable hydraulic dredging services that exceed our clients' expectations, making us "the clear choice™" for your next project. We perform our dredging services for customers throughout the United States and North America. Projects outside the U.S. in the western hemisphere are considered on a case-by-case basis.

A diverse client base helps Dredge America to find success across the US market and gives our team the opportunity to partner with clients on private projects, at industrial facilities, municipalities, government agencies, and more. Our contracting services include lake dredging, marina dredging, mine tailings dredging, power plant dredging, channel & canal dredging, wetland creation, island creation, industrial lagoon dredging, pond dredging, golf course dredging, CCR dredging, papermill dredging, and river dredging.

Rental Services

Dredge America's rental fleet includes well-maintained, easy to operate dredges and support equipment suitable for any size portable hydraulic dredging project. Our rental program is ideal for clients such as diving companies, private homeowners, mechanical dirt contractors, homeowners' associations, golf courses, lake management companies, general contractors, marine construction companies, and marinas.

Consulting

Dredge America provides design-build consulting services for project owners who need help planning and implementing a portable hydraulic dredging project. Our turnkey process allows owners to become part of a complete project team, without the responsibility of finding contractors, ordering surveys, and applying for permits.

Our team of highly qualified and experienced engineers are available on an hourly or project fee basis, based on our clients' needs. We understand that many clients don't have the knowledgebase or time to develop a fully dimensional dredging plan. We can assist at any phase of the dredging process from initial planning to project completion.

Company Overview

Dredge America is a multi-generational family-owned small business focused on portable hydraulic dredging services to restore our nation's lakes, rivers, wetlands, and waterways. We have engaged in over 400 projects with varying scopes and budget levels and know each dredging project is unique. As innovative problem solvers, we approach each job as an opportunity to perfect our trade. Dredge America's proven 35+ year track record, industry leading team, and specialized expertise allows us to partner with our clients to save time, money, and mitigate risk, while delivering the highest quality project results.
